To Address Barriers Related To

- Early experience – later life outcomes

- Internal inefficiency – school system/push-pull

- Inclusion: access, disability, violence/school safety

- Quality – performance; bimodal curve; weak teacher capacity

- Sub-national capacity, and accountability

- Assessment: frameworks, utility,

- ICT – and learning outcomes improvement

- Adolescent 'mixes': HIV, teen pregnancy, drugs

Technology May Help To

- Support more flexible, dynamic & faster data collection

- Cover more people at lower cost – e.g. SMS based data

- Enable quicker assessment of results

- Support visualization of & open access to M&E data

- Satisfy CSO demands for transparency & accountability

- Supplement existing methods - a single method cannot cover all monitoring needs and requirements

Ideas about the four Cases…

…for impact at the UNICEF!!
